Why should choose digital signage

Marigold Digital Signage are used to display **“Multimedia content** such as **Images, Videos, Text, and Animations”** in various spaces such as **“Malls, Retail stores, Education Centers, Restaurants, Hotels, Corporate Offices, Airports, and Other Public Spaces.”**

These displays can vary in size from small screens to large video walls and can be mounted on walls, ceilings, or freestanding structures.

Our signage offers several advantages over traditional static signs, including:

- **Dynamic content**: Our digital signage allows for the easy creation and management of dynamic content, enabling businesses to update information in real-time and tailor messages to specific audiences or events.
- **Remote management**: Our digital signage systems come with software that allows users to remotely control and manage content across multiple displays from a central location. This feature is particularly useful for businesses with multiple locations.
- **Interactivity**: Our digital signage displays are equipped with touchscreens or sensors that enable interactivity, allowing users to engage with the content in various ways such as selecting options, entering information, or playing games.
- **Improved engagement**: The dynamic and visually appealing nature of digital signage makes it more engaging than traditional static signs, helping to capture the attention of passersby and effectively communicate messages.
- **Cost-effectiveness**: While the initial investment in digital signage may be higher than traditional signage, it can ultimately be more cost-effective in the long run due to the ability to easily update content without the need for printing and distributing new materials.

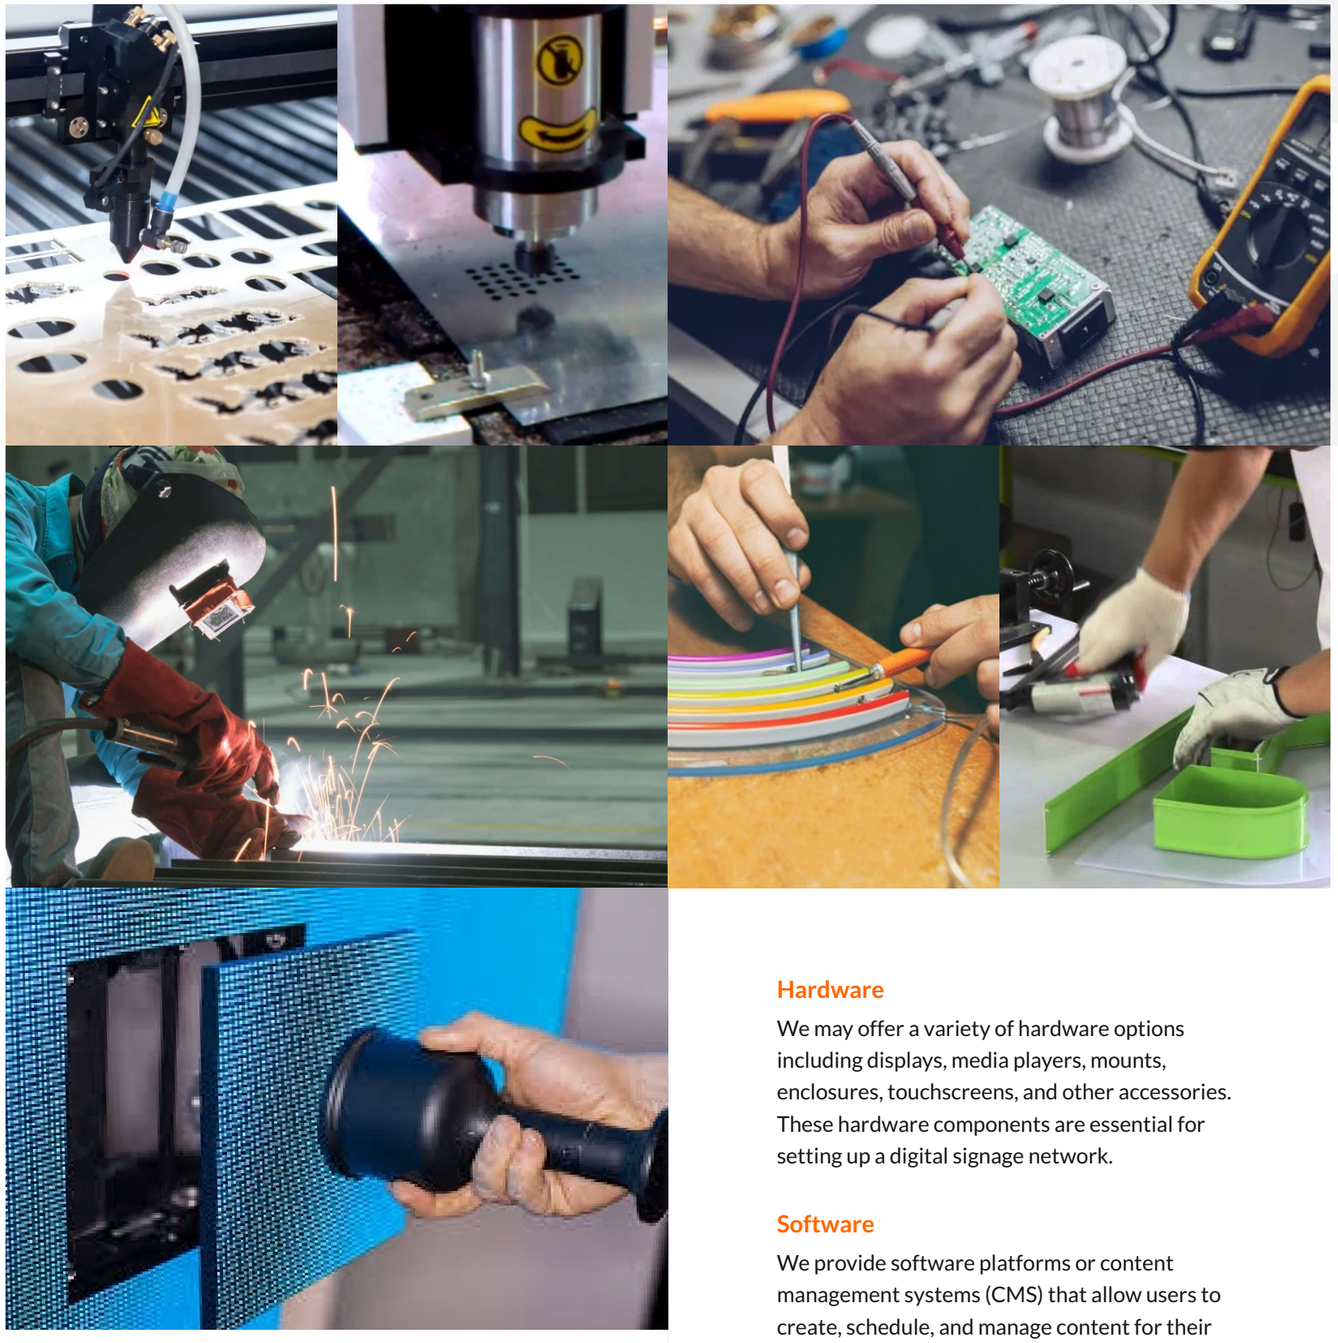
Who we are

Marigold ADCAST

We play a crucial role in helping businesses leverage the power of digital signage technology to communicate with their target audiences effectively and enhance the customer experience.

Years of Expertise and Customer-Centric Support: Marigold Adcast Unmatched Understanding and Exceptional Service

We are specializes in providing products and services related to digital signage solutions. We offers a range of offerings including hardware, software, content creation, installation, maintenance, and support services. Here are some key aspects of a digital signage company:



Our Products

01. Easel Digital Signage
02. Totem Digital Signage
03. Wall Mounted Digital Signage
04. Video Wall Digital Signage

Hardware

We may offer a variety of hardware options including displays, media players, mounts, enclosures, touchscreens, and other accessories. These hardware components are essential for setting up a digital signage network.

Software

We provide software platforms or content management systems (CMS) that allow users to create, schedule, and manage content for their digital signage displays. These software solutions often come with features for remote management, content templates, analytics, and integration with other systems.

Our Solutions

Installation

We may offer installation services to help businesses set up their digital signage displays properly. This includes mounting displays, connecting hardware components, configuring software, and testing the system for optimal performance.

Maintenance and Support

We provide ongoing maintenance and support services to ensure that the digital signage network operates smoothly. This may include troubleshooting technical issues, software updates, hardware repairs, and customer support.

Custom Solutions

We can be designed to fit the specific needs and branding of a business or organization. This includes selecting Signage Shape & Style, colors, and portability that align with the overall brand aesthetic.

Content Creation

We offer content creation services to help businesses design visually appealing and effective content for their displays. This may include graphic design, video production, animation, and interactive content development.
